

AV/IT Services

Private Networks – Wireless

If for confidentially reasons you require a password-protected, secure private network for your meeting, St. Andrew's will provide your group with everything you need to establish a reliable and secure, high speed network for your exclusive use.

This service includes:

- Pre-meeting review and consultation with our IT personnel
- Use of our wireless router and fiber optic network
- Back up routers on site
- 300 Mbps wireless network using the latest wireless "n" equipment
- Stand-by DSL network in case of downtime from our primary carrier
- Complete testing prior to the meeting
- Support for individual participants to ensure successful connection to the network for 100% of the attendees
- Loan of wireless cards in the event one or more participants arrive with laptops that are unable to connect to the network
- On-site technical support throughout the meeting
- Priority IT support service
- "Peace of Mind" AV/IT Package included

This package is priced at \$300 for the first day, plus \$150 per each additional day (5 day maximum) for up to 20 connections to the private network. For each additional connection over 20, a charge of \$10 will apply.
